

Dear Friend –

GreenFaith, New Jersey's interfaith environmental leader is pleased to partner with Globe Electric and the New Jersey Clean Energy Program to bring you *The Hour of Clean Power* – a program to distribute 40,000 ENERGY STAR® Compact Fluorescent Bulbs (CFLs) and 10,000 ENERGY STAR desk lamps at no cost to urban faith communities around New Jersey.

CFLs generate the same light as a traditional bulb while using only 25% of energy. **At current energy costs, each of these bulbs will save its owner over \$40 in energy costs during the bulb's lifetime.**

In all, these 40,000 bulbs will save the state's urban communities over \$1.6 million.

Whether you use an ENERGY STAR CFL in an existing light fixture or a new ENERGY STAR desk lamp, the results will be the same – big savings for you and for the environment.

GreenFaith is committed to helping diverse faith-based communities become environmental leaders. We believe that people of all faiths are called to be good stewards – of the environment and of their finances.

The Hour of Clean Power provides you with the opportunity to be a good steward. All you need to do is install your CFL or replace your old desk lamp with your new ENERGY STAR one – and you've begun to make a difference.

Thank you for participating in the Hour of Clean Power. Please contact us at info@greenfaith.org if you want to know about more opportunities to help your congregation practice good stewardship.

And thank you for doing your part to steward your resources and to protect Creation.

Sincerely,

A handwritten signature in black ink, appearing to read "Fletcher Harper".

The Rev. Fletcher Harper
Executive Director

PS – Look inside this packet for \$150 worth of energy saving coupons, and information about how you can save more energy at home. We hope you enjoy it.
